

# EXPANSIONS/UPGRADES & ENHANCEMENTS

Material Handling Equipment Specialists

As your business grows, so does the impact on your material handling system. Whether your production needs have multiplied or the processes you have in place are changing, W&H System's experienced team can help you adapt your system to your company's current needs.

W&H Systems is a leader in the supply of material handling system integration including turnkey system expansions, equipment upgrades and enhancements. No matter how big or small a project is, we have the system integration and installation expertise to provide a quick, effective and safe installation of the equipment with minimal or no interruption to existing daily operations.

Our goal is to improve or modernize the existing system giving it the flexibility to meet quick changing business demands and prepare it for future needs. We pride ourselves on our ability to optimize system performance and on our system integration skills that include coordinating strategic partnerships with other material handling equipment suppliers when needed.

System upgrades or enhancements can improve the overall performance and efficiency of a system. Updated controls, software, and components may be all that your system needs for increased operating efficiency to meet future demands and get the most out of your system.

W&H Systems has the resources and innovations of a highly respected systems integrator, along with the dedication and commitment to work with you and your existing equipments special needs. There is no company that can match our experience and commitment to the material handling system aftermarket.

We will work with you to develop a cost-effective solution that will address your specific problems and concerns and that will modernize your system for peak performance. W&H Systems ensures that our clients' material handling needs will be met on-time and on-budget.

Our capabilities include:

## MECHANICAL & STRUCTURAL

Essential to the basic integrity and performance of your entire system, mechanical and structural upgrades cover a wide range of improvements. Whether you are expanding your system by adding additional conveyor lines or spurs, relocating equipment, or simply replacing worn or obsolete components, W&H Systems has the capability to provide any mechanical and structural improvements that your system requires.

## ELECTRICAL CONTROLS

Control retrofits can greatly enhance the efficiency of your automated material handling equipment while reducing your cost of parts and labor, and improving your support options. Equipment can be retrofitted with new controllers, motors and drives, operator interfaces, communications, power systems and graphical diagnostics. W&H System's engineers have experience with most of the currently available programmable controllers.

## COMPUTERS & SOFTWARE

Material handling equipment is only as reliable and functional as the computer that automates it. If your existing computer system meets your needs but capable support is unavailable, we have the capability to working with it as it presently stands in order to deliver increased function and reliability.

If you suffer from hardware obsolescence or fragile application software, we can migrate your current software to a supported platform or replace it with a W&H System's developed system with standard modular components.
